## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 24-30, drawn to a method, classified in class 438, subclass 710.
- II. Claims 21-23, drawn to a product, classified in class 438, subclass 1<sup>+</sup>.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the patterned monolithic circuit as claimed can be made with a process not requiring a plasma chamber and only wet chemical cleaning combined with a source of power such as ultrasonic power and/or ultraviolet radiation can be used to obtain the same result.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
